SUPPLEMENTARY LIST

MAYFAIR NURSERIES

93 Highland Ave.

Bergenfield, New Jersey

MAYFAIR NURSERIES, BERGENFIELD, NEW JERSEY

TERMS—"Cash-with-Order"—Our prices include packing charges. Remittances may be made by check or Post Office Money Order.

DELIVERY—F.O.B. Nurseries, Bergenfield. If parcel post shipment is desired, add 10% to the total value of the order. On small parcels where plants are wanted in a hurry, a "Special Handling" stamp of 25c will speed up delivery. This is additional to the 10% for postage.

We do not solicit orders for less than \$1.00.

CLAIMS FOR DAMAGE IN TRANSIT—All goods are shipped at purchaser's risk after they are delivered to the forwarding company.

All other claims must be made direct to our office within five days of receipt of goods.

GENERAL CULTURAL DIRECTIONS

No. 1—Common garden soil—light and well drained.

No. 2—1-3 loam—1-3 sand and gravel—1-3 leaf mold—suits most rock plants.

No. 3—Bog Plants—moist situation—1-3 peat—1-3 leaf mold or decayed turf—1-3 good loam.

No. 4—Wood Plants—Acid loam—2-3 leaf mold (oak, beech conifers decayed leaves)—1-3 loam—Avoid lime.

No. 5—Alpines—Moraine culture—Dig pocket 1½ ft. deep, fill 1 ft. with 1" or 1 or 1½" broken stones—balance filled with 2-3 coarse gravel and 1-3 leaf mold and loam.

Letter "E" following culture number means exposed to full Sun.

" "L" following culture number means ½ shade or morning Sun, or shelter from burning mid-day or afternoon Sun.

" "S" following cultural number means shade—northern exposure.

" "M" following cultural number means to be grown with other plants, so roots may run together—preferable plants of same height.

EXAMPLE—*Linaria Hepaticaefolia* No. 4 LM—Acid loam—semi shade, planted with *Sedum Ternatum* or any other dwarf plant requiring same exposure.

While these cultural directions are the results of observation made and believed to be best suited for the different Rock Plants, the man or woman willing to experiment will find many thrills, successes and failures in trying other means. We repeat that these directions are general in their scope, and meant to suit general locations.

- IMPORTANT -

We cannot urge too strongly the necessity of ordering early. While all our plants are of the same quality and size, our stock on many varieties may run short and he who comes first, will be served first.

3 PLANTS OF A KIND AT THE 10 RATE

MAYFAIR NURSERIES, BERGENFIELD, NEW JERSEY

	Height	Cul- ture	Price Each	Per Ten
ACAENA BUCHANANI. —A very choice silvery blue creeper, valuable for its compact growth and interesting seed burs—Wall-Walks	3"	1	60c	\$4.00
ALSINE GRACILIS SPECIOSA. —Little creeper—easy and good bloomer—for walls and paths	3"	1E	35c	3.00
ALSINE LONGIFOLIA. —A mat mat-forming plant from the Orient—small white starry flowers in profusion	8"	1	40c	3.50
ANEMONE HUPEHENSIS. —The crowning glory of the autumn garden—beautiful "Rose du Barry" flowers poised on 12-18" stems—very charming. Blooms for a long time	18"	1L	50c	4.25
ANDROSACE WATKINSII. —An easy growing form of A. Sarmentosa, more compact and smaller. A good addition to the rock garden	6"	2L	75c	6.25
ANEMONE GLOBOSA. —An early blooming kind—Dull carmine flowers—an unusually fine sort.	15"	1LS	35c	3.00
ANEMONE SYLVESTRIS. —A late summer and full bloomer with beautiful white flowers—will thrive in shady damp places with sun part of the day	12"	1L-4L	50c	
ANEMONE PATENS. —The Western edition of Anemone Pulsatilla—beautiful lilac shade—Blooms later than its cousin, A. Pulsatilla	10"	2L	50c	4.25
ANEMONE NEMOROSA. —Wild wood Anemone of Europe. Mrs. Wilder calls it delicate and charming—it is a good plant, multiplying very fast—Early—Pink	8"	4L	50c	
ANEMONE NEMOSA FLORE PLENA. —Double form of the above, choice and rare	8"	4L	75c	
ANTENNARIA RHODANTE. —Silvery foliage and good ground cover for sandy dry places—white 10" in bloom	8"	1L	35c	3.00
ANTHEMIS MACEDONICA. —A dainty little plant from the Balkans—grey lacy foliage and white daisies	4"	1	40c	
ARABIS MOLLIS. —Evergreen ground cover of neat glossy rosettes—profuse bloomer—white	4"	1	50c	4.25
ARCTOSTAPHYLOS UVA URSI. —The Bearberry—Evergreen trainer with small pink flowers. Excellent for rocky slopes and sandy banks—leaves turn red in fall	3"	1E	40c	3.50
ARENARIA BALEARICA (true). —It is called creeping moss and it has myriads of little white flowers in May and June—fine to cover damp rocks and steps in shade	½"	13	40c	3.50
ARENARIA MACROPHYLLIA. —A native of Kentucky and surrounding states. It is as choice as is rare and is a wonderful bloomer, gleaming white—May-June	6"	1-4	50c	4.25

MAYFAIR NURSERIES, BERGENFIELD, NEW JERSEY

	Height	Cul- ture	Price Each	Per Ten
ARMERIA FORMOSA.—A tall growing sand thrift. Very effective when planted in mass or in the wall. Round heads of pink flowers	12"	1	30c	\$2.50
ASARUM EUROPEUM.—Evergreen form of our Wild Ginger, comes from Europe—it makes a fine carpet for early blooming bulbs in shady corner of your rock garden	3"	4L	75c	
ASPERULA CINANCHICA.—A little gem for a dry and sunny position—pink—continuous summer bloomer	4"	1E	60c	
ASPERULA HEXAPHYLIA.—The sweet Woodruff of the Appenine Alps—forms hummocks of fine foliage and stems with a profusion of small white flowers in Summer	8"	1E	40c	3.50
ASPERULA HIRTA.—A tiny little mite from the Pyrennes—mossy, greyish, green cushions, bearing heads of white flowers turning pink ..	3"	2L	75c	
ASTER ALPINUS ALBUS.—White form of the well-known Alpine Aster	6"	1	40c	3.50
ASTRAGALUS SYRINICUS.—A dwarf carpenter fine cut foliage and innumerable little yellow pea-shaped flowers in early Summer	4"	1	60c	
CAMPANULA CARPATHICA AZURE FAIRY.— An improved variety of the harebell. Azure blue—very choice	8"	1	40c	3.50
CAMPANULA NORMAN GROVE.—Prize winner at Chelsea—A. M. R. H. S.—a very free flowering species with light blue flowers	6"	1	60c	
CAMPANULA PUSILLA ALBA.—Charming white form of Pusilla, just as free flowering—July- September	3"	4	60c	
CAMPANULA RADDEANA.—A beautiful rich dark blue kind—with leaves tinged bronze red. Wants sun and grit	9"	2	75c	
CYCLAMEN HEDERAEFOLIUM.—Wild European species with beautiful ivy shaped leaves mar- bled and a profusion of bright rose flowers in the Fall	6"	4S	1.00	
CYCLAMEN HEDERAEFOLIUM ALBUM.—Rare white companion of the above	6"	4S	1.25	
COTYLEDON SIMPLICIFOLIUS.—A very neat plant—so neat it always seems dressed up, especially so when its yellow drooping flowers appear in June	4"	1	50c	4.25
DIANTHUS ASPER.—A neat cushion forming pink —very dwarf and free flowering	4"	2	50c	
DIANTHUS CAESIUS NANUM COMPACTUS.— As the name implies it is a very close and compact growing variety of Caesius and the flowers are just as fragrant	3"	2	60c	
DIANTHUS DELTOIDES ALBUS.—White flower- ing form of D. Deltoides—very free flowering ..	4"	1E	30c	2.50

MAYFAIR NURSERIES, BERGENFIELD, NEW JERSEY

	Height	Cul- ture	Price Each	Per Ten
DIANTHUS GRANITICUS. —An improvement over Deltoides—stays more at home and its flowers are larger and deeper in color	4"	1E	40c	\$3.50
DIANTHUS SERPYLLIFOLIUS. —Very small creeper, forming close carpets of little leaves—a choice kind	2"	1E	50c	4.25
ERIGERON LEIOMERUS. —A great English horticulturist calls it, "the daintiest possible little daisy-like minute Aster Alpinus."	3"	2	75c	
ERIGERON COMPOSITUS. —One of our Western gems—Finely cut silver grey foliage and pale lilac flowers—a real beauty	3"	2E	75c	
GENISTA PROSTRATA (Cytisus Decumbens). —A beautiful, invaluable creeping shrub for the rock garden—blooms in June—yellow. Strong plants	3"	1E	1.25	
GENTIANA LINEARIS. —A Rare Native with lance shaped leaves and pale blue funnel shaped flowers	12"	1	75c	6.00
GENTIANA ANDREWSII ALBA. —I have found this form in the middle West and believe it to very rare, as I never heard of it or saw it before	12"	1	1.25	
GLOBULARIA CORDIFOLIA. —A sub-shrub of merit—compact grower and creeper—will cover large rocks—lavender blue flower heads—June	4"	2	75c	6.00
GLOBULARIA NANA. —Another shrubby kind with very minute foliage—Dark green and little round blue flower heads. One of the choicest rock plants	2"	2	75c	6.00
GYPSOPHILA ALPIGENA. —A dwarf ground cover—Rose flowers and blue foliage—neater than G. Repens Rosea	4"	1E	50c	4.25
GYPSOPHILA LIBANOTICA. —Similar to the above—spreads faster—fine in wall	4"	1E	50c	
HEDERA MINIMA. —I have only a limited stock of this rare gem. It is a tiny Ivy Bush, Evergreen. Young plants			2.50	
HUDSONIA TOMENTOSA. —A compact little wooly grey shrub completely covered with yellow flowers in June—hot sandy position	6"	1E	75c	
HUDSONIA ERICOIDES. —Similar to the above—resembles Scotch Heather—same culture	6"	1E	75c	
HELONIAS BULLATA. —Early Bloomer—Dense spike of lilac blossoms with bright blue stamens—April-May	12"	3	50c	
HUTSCHINSIA AUERSWALDII. —From the Spanish Sierras comes this little beauty, tufty and compact—fine shiny foliage and white flowers—April	4"	2L	60c	5.00
IRIS CRISTATA ALBA. —The rare white form of the crested Iris of Southern States	4"	4	2.50	

MAYFAIR NURSERIES, BERGENFIELD, NEW JERSEY

	Height	Cul- ture	Price Each	Per Ten
IRIS GORMANNI.—A lovely westerner with beautiful lavender blue flowers and grass-like foliage	12"	2	75c	\$6.00
IRIS PRISMATICA.—A graceful native with narrow foliage and pale blue and white flowers on thin stems	12-15"	3	40c	3.50
IRIS TENUIS.—Another charming visitor from the Pacific coats—flowers vary in color but are delicate and lovely	8"	2	75c	6.00
LEWISIA OPPOSITIFOLIA.—An american rock plant from the Rockies—has long thin leaves—dark green with red tips and heads of white flowers	6"	2E	50c	4.25
LINUM PERENNE ALBUM.—White form of the old-fashioned blue flax	12"	1E	40c	3.50
LINUM FLAVUM.—A bush-like perennial very showy when in bloom—beautiful heads of gold—yellow in June	8"	1E	40c	3.50
LITHOSPERMUM PROSTRATUM HEAVENLY BLUE.—A dwarf shrub—beautiful intense blue flowers—likes acid soil and some protection	3"	2	1.00	
PHYSOSTEGIA VIRGINICA BRILLIANT.—A new introduction—very free bloomer and dwarfer than P. Virginica—thrives in semi shade	12"	1	50c	4.25
PHLOX ADSURGENS.—A western trailing species with intense pink flowers—a good sort	6"	2	50c	
PHLOX SUBULATA APPLE BLOSSOM.—One of the choicest—moss pink with soft rose flowers in profusion	3"	1E	50c	4.25
PRIMULA FRONDOSA.—A Greek cousin of P. Farinosa—more vigorous and easier dealt with—delightful flat heads of lilac pink flowers	6"	3L	75c	6.00
PRIMULA DENTICULATA.—Resembles P. Cashmeriana	8"	3L	50c	4.25
PRIMULA JAPONICA AETHNA.—A beautiful form of P. Jan.—rich shade of salmon rose ..	12"	3	75c	
PRIMULA VERIS DUPLEX.—The old-fashioned Hose in Hose primrose—quaint and charming ..	6"	1L	40c	3.50
RAMONDIA PYRENAICA.—Large flat rosettes of hairy leaves—beautiful flowers—pale lilac with orange eye—June	6"	5S	1.00	
RANUNCULUS SPECIES.—I found this little tiny creeper growing on the edge of a North Jersey lake—it has fine grass-like leaves ¼" long and myriads of tiny gold flowers—thrives in wet sand in full sun	1"	2	50c	4.25
Note: Height of Saxifrages is given when in full bloom.				
SAX. AIZOON MARGINATA.—A form of S. Aizoon with very pronounced silvery edge	8"	2	60c	5.00
SAX. AIZOON PROLIFERA.—Encrusted form with narrow dark green leaves—white	6"	2	75c	

MAYFAIR NURSERIES, BERGENFIELD, NEW JERSEY

	Height	Cul- ture	Price Each	Per Ten
SAX. APICULATA ALBA.—Rare white variety of Sax. Apic.	4"	2	\$1.00	
SAX. CUNEIFOLIA INFUNDIBULIFORMIS.—One of our introductions—the mother plant comes Farrer's garden—it is like a miniature London pride and a little gem	4"	2L-4L	1.25	\$10.00
SAX. JUNIPERINA.—Belongs to the mossy and for neatness of growth and foliage beats all the other mossy kinds—very floriferous—white	6"	1L	75c	
SAX. LONGIFOLIA.—Well named "the Queen of Saxifrage"—does not make any offsets and blooms but once—enormous rosettes edged with silver—immense flowering pyramids of white blossoms	24"	2	75c	
SAX. LONGIFOLIA COTYLEDON.—An easy and fast growing kind with red speckled flowers	15"	2	75c	
SAX. LUTEO VIRIDIS.—One of the rare Cushions Sax. Spiny foliage and numerous small yellow flowers—Spring	4"	2	1.00	8.50
SAX. PRIMULOIDES ELLIOTT'S.—A great improvement over Primuloides—We are introducing this plant for the first time—very neat grower and charming sparkling pink blossoms	4"	2L	2.50	
SAX. PROLIFERA.—Large rosettes of dark narrow green leaves with clear white edges	12"	2L	75c	
SAX. AIZOON FLAVESCENS.—Compact encrusted kind with small (1" diam.) globular rosettes and yellow flowers—a good kind	8"	2L	75c	
SAX. OPPOSITIFOLIA.—A little dwarf creeping species with beautiful cerise flowers in June	2"	2	75c	
SAX. ZIMMETRI.—For neatness and good habits it is one of the best—very attractive little rosettes— $\frac{1}{4}$ " to $\frac{1}{2}$ " diam.—of a light blue grey—another new introduction by Mayfair	3"	2	1.00	
SEDUM EWERSII MINOR.—A very dwarf form of Ewersii—only 2"—beautiful and rare	2"	1E	60c	
SEDUM MIDDENDORFIANUM DIFFUSUM.—A new introduction from Europe—similar to Middend, but neater—very rare	6"	1E	60c	
SEDUM OREGONUM.—Grows like a little Japanese tree all twisted, branches terminated with round fat leaves—turn red in fall—yellow... ..	3"	1E	50c	
SEDUM CARNEUM FOL. VARIGATUM.—A compact-growing kind—long pointed leaves veined white-pink	6"	1E	75c	
SEDUM DOUGLASSI.—A Western species—attractive for its dark brown branches covered with spiny leaves—yellow	6"	1E	50c	
SEMPERVIVUM ARENARIUM.—A very dwarf and small species—spiny scales, green inside red outside—yellow—rare	4"	1E	50c	
SEMP. BRAUNII.—A cousin of S. Tectorum but more choice—rosettes are smaller, leaves narrower and reddish outside—yellow	8"	1E	50c	

MAYFAIR NURSERIES, BERGENFIELD, NEW JERSEY

	<i>Cul- Height</i>	<i>ture</i>	<i>Price Each</i>	<i>Per Ten</i>
SEMP. DOELLIANUM.—Neat grower—grey rosettes of hairy leaves, turning red and closing in fall—Brick red	6"	1E	40c	
SEMP. FIMBRIATUM.—Somewhat similar to S. Doellianum—larger rosettes—light rose	8"	1E	50c	
SEMP. GLAUCUM.—Fat rosettes, slightly hairy, grey blue—Brown yellow flowers	6"	1E	35c	
SEMP. LAGGERII.—Compact grower—similar to S. Arachnoideum with cobweb and red tinted leaves outside—rose	4"	1E	50c	
SEMP. METTENIANUM.—A large growing kind resembling E. Tectorum but leaves more numerous—rosy flowers	8"	1E	50c	
SEMP. PITTONI.—A rare and beautiful plant, silver grey velvet rosettes and pale yellow flowers	6"	1E	50c	
SEMP. SOBOLIFERUM.—A form of Globiferum, slightly more open—offsets are not attached to the plant—Yellow	8"	1E	30c	\$2.50
SEMP. TECTORUM ATROVIOLACEUM.—Form of Tectorum with outside leaves shaded purple.	10"	1E	35c	3.00
SILENE PENNSYLVANICA.—Our beautiful Rock Pink native—Mrs. Wilder calls it "one of the beauties of the family"—intense pink	6"	4E	40c	
SPIREA FILIPENDULINA FL. PL.—Ferny foliage and splendid spike of white flowers lasting a long time—fine for shade or moist places	12"	3L-4L	50c	4.25
THALICTRUM MINOR.—Very dwarf variety of meadow rue — pretty white sprays—fine for shade	6"	1-3-4	35c	3.00
THALICTRUM ANEMONOIDES.—A very graceful native for damp, shady places	12"	3 or 4S	35c	3.00
TROLLIUS EUROPEUS ORANGE GLOBE.—A beautiful free flowering plant for semi shade —globular orange flowers	15"	3-4L	50c	4.25
TROLLIUS CHINENSIS.—Dwarfer than the above with pale yellow flowers equally choice	12"	3-4L	50c	4.25

SHRUBS

- ACER DISSECTUM VIRIDIS.**—Dwarf Japanese maple with finely cut leaves—a wonderful twisting tree for rock gardens—new growth is pinkish. 1A grafted stock—12"—\$2.50.
- ACER DISSECTUM ATROPURPUREUM.**—Same as above but the foliage is crimson red and turns crimson as the season advances—choice specimen. 1A grafted stock—12"—\$3.00.
- ABELIA CHINENSIS.**—A charming little shrub—semi evergreen—continuous bloomer—small pink trumpets. 6"-8"-B-B—\$1.00.
- ANDROMEDA FLORIBUNDA (Pieris Floribunda).**—The little mountain fetterbush—evergreen and very hardy—waxy white raceines in May—fine for background in shady corners. 12"-15"—\$4.00—18"—\$5.00.
- ASCYRON HYPERICOIDES.**—Very dwarf shrub—compact and valuable for its clear golden yellow flowers. 6"-75c.
- AZALEA AMONEA FL. PL.**—The double form of the dwarf Japanese Azalea—a real beauty.
- BERBERIS BUXIFOLIA NANA.**—A semi evergreen dwarf shrub, very compact, resembles a dwarf boxwood but more interesting. \$1.00
- BERBERIS JULIANA.**—Evergreen—beautiful spiny oval leaves and bright golden stems and thorns—has splendid yellow flowers—fine for background—semi shade. \$1.25.
- BERBERIS LEAVIS.**—Evergreen—a rare Berberry from W. China—slow grower—dark green leaves above and grey beneath—yellow. \$1.00.
- BERBERIS VERRUCULOSA.**—The handsomest after B. V. Compacta, has little crinkly holly leaves and fine compact habit. \$1.50.
- BERBERIS VERRUGULOSA COMPACT.**—A dwarfer type of the above—a real gem. \$2.50.
- CYTISUS DECUMBENS (Genistra Prostrata).**—One of my pets—a charming prostrate little evergreen creeper all dressed up with brilliant yellow flowers in May. 3"-1E—\$1.50.
- COTONEASTER ADPRESSA.**—A wonderful dwarf creeper—will drape itself over the rocks and trace their reliefs—pink flowers followed by red berries. 3"-4" high. Small size \$1.50—larger size 8"-12" spread—\$3.50.
- COTONEASTER BUXIFOLIA.**—A compact shrub, with curiously twisted branches like a dwarf century-old Japanese tree—semi evergreen. Small potted plants \$1.50.

MAYFAIR NURSERIES, BERGENFIELD, NEW JERSEY

- COTONEASTER HUMIFUSA.**—Prostrate trailer—lustrous dark green foliage—3"-4" high—evergreen—fine to cover large rocks.
\$1.50.
- COTONEASTER MICROPHYLLA.**—An evergreen variety with small oval leaves—sprawling habit—masses of red berries in fall and winter.
\$1.00.
- COTONEASTER MICROPHYLLA WHEELERII.**—Fine variety of the above.
\$1.00.
- COTONEASTER SALICIFOLIA FLOCCOSA.**—A beautiful variety to creep over large rocks in background—white flowers, red berries.
1E-\$1.50.
- COTONEASTER THYMIFOLIUS.**—A finer leaved species than C. Microphylla—a very choice subject—dwarf and slow growing.
\$1.50.
- DENDRODIUM BUXIFOLIUM.**—Prostrate and compact evergreen little shrub, 6" high, completely covered with fluffy white flowers in June—acid soil. Strong plants.
\$1.00.
- ILEX CRENATA.**—Japanese Holly—compact and slow grower—much branched habit—small glossy leaves.
Small plants 75c—15"-18" \$3.00.
- ILEX CRENATA MICROPHYLLA.**—A smaller leaved variety of the above and somewhat hardier.
18"-24" \$4.00.
- CHIOGENES HISPIDULA.**—A rare native sub-shrub 1"-2" high forming large mats of evergreen foliage—choice.
2½" pots \$1.00.
- LONICERA NITIDA.**—An evergreen shrub for a southern exposure—Compact grower, densely clothed with small glossy leaves. Flowers white in pair—sweetly scented, a beautiful shrub. Needs protection around Boston and northward.
Small plants 75c—10"-12" \$1.50.
- LONICERA PILEATA.**—Another dwarf evergreen honeysuckle shrub somewhat prostrate—hardier than Nitida—white flowers—fragrant.
8"-10" \$1.00.
- MAHONIA AQUIFOLIUM.**—Evergreen Oregon Holly—slow growing dark green—glaucous leaves—silvery beneath. Yellow flower and black fruit.
12"-15" \$2.00.
- PACHYSTIMA CANBYII.**—A charming low (10") growing evergreen shrub with narrow toothed leaves—does well in shade.—Branches root as they go. 75c.
- PERNETIA ATROPURPUREA.**—A most attractive dwarf shrub from the Andes—evergreen—narrow foliage and much branched. Valuable for the display made by their beautiful and profuse berries in fall and winter—bright red.
Small plants 75c.
- PERNETIA ROSEA.**—Same as above—pink berries.
Small plants 75c.

PERNETIA NIGRA.—Same as above—dark red berries.

Small plants 75c.

PICEA EXCELSA GREGORIANA.—A dwarf evergreen—very compact and dense. One of the choicest conifers for the rock garden.

15" spread \$5.00

PICEA EXCELSA MAXWELLI.—1-1½"—equally as choice as the above—just as compact—light foliage.

12"-15" spread \$6.00.

TSUGA CANADENSIS SARGENTI PENDULA.—One of the rarest dwarf Hemlock—very slow growing—compact and prostrate—a beautiful subject in Japanese gardens or placed above large rocks.

10"-12" spread \$6.50. 15"-20", \$15.00. 3' spread \$20.00. Larger specimen, 40" spread, \$75.00.

TSUGA DIVERSIFOLIA.—Rare Japanese hemlock—compact and curiously shaped.

18"-24", \$12.00. 2'-2½', \$15.00.

VACCINIUM BUXIFOLIUM.—A pretty dwarf ground cover shrub 6" high, somewhat like *V. Vitis* idea, but a little larger in leaf—a choice plant.

Strong plant \$1.00.

VIBURNUM OPULUS NANUM.—A compact growing shrub related to the snowball but of exceedingly compact and floriferous habit.

6"-9". \$1.25.

"BLUE RIBBON COLLECTION OF ROCK PLANTS"

Alyssum Saxatile Compactum
